# Summer Project

Kitchen Update from Mrs. Kate  
Moll, Principal

Recently, we dug a hole in our kitchen where our dishwasher is. The cast iron plumbing has corroded and needs to be replaced. Once the pipe was exposed, we needed to reassess the situation and create a new plan as the damage was far worse than expected. I want to thank Blessed Sacrament Parish for their fast action on moving forward to extract the pipes, recruit a professional asbestos abatement team, and expedite the necessary documentation to the diocese, as this was an unexpected project. Everyone is working very hard to complete as much of the work as possible before our first day of school. I would like to thank Fowler & Hammer, asbestos remediation specialists, Hengel Brothers Inc., BSP buildings and grounds, Deacon Allan and other parish members, without you this would not be possible.
